Pair with Bluetooth headphones

STEP 1 Slide the switch to "ON". Upon first time use, the SoundJet R2 will enter PAIRING mode automatically. For subsequent use, put it into PAIRING mode by pressing & holding the MFB until the **A** indicator flashes blue and red alternately.

STEP 2 Put your Bluetooth headphones into pairing mode.

STEP 3 Keep the SoundJet R2 & your device close together and wait for 5-10s until they connect. Once connected, the **A** indicator will turn solid blue.

The next time you use it, it will auto-connect to the last paired device within 5-10s after turned on. If not, press the MFB button on the SoundJet R2 once to reconnect.

FAQ avantree.com/support/soundjet-r2

NOTE: AirPods in particular will always prioritize Apple devices for automatic pairing, so you'll need to turn your iPhone's Bluetooth OFF when pairing your AirPods with the SoundJet R2. If you get one side sound / no sound issues when pairing with AirPods Pro 2, put the AirPods Pro 2 back into its case and close the case. Then open the case, wait for 3 seconds until the LED light turns off on the case.

Charging

When the LED indicator flashes Red, you should charge the device. The LED indicator will turn solid red while charging and off when completed. It normally takes around 2 hours to fully charge.

FAQ

Below are some of the most common questions people have during setup.

How to add a second pair of headphones to the SoundJet R2?

Once your first device is successfully connected, get the SoundJet 2 and your second pair of headphones into pairing mode. Wait for a while. Once connected, both the connection LED indicators will be solid blue.

Why is there no sound when I connect it with my PC's USB port?

When connecting with a PC's USB port, please make sure to set both the "input" and "output" as SoundJet R2 on your PC. You may also need to adjust the settings again in your VoIP app itself.
