Answer/End a call	Short press 
Reject a call	Hold  for 2s when receiving an incoming call
Last number redial	Double press 
Mic mute on/off	Short press  once to toggle mic mute on/off during a call. Once mic mute on, the status LED will keep RED .

Connect speakerphone to smartphone

Connect to 1st smartphone (first time use)

1. Slide OFF/ON/FM switch to "ON" position to turn on speakerphone. It will automatically go into **PAIRING MODE** – status LED flashes **BLUE** and **RED** alternately.
2. **On your device** – Turn on Bluetooth, search and select "Avantree Roadtrip" to connect.
3. Once connected, you will hear "Connected" prompt from speakerphone.

Connect to 2nd smartphone

1. Put the speakerphone into **PAIRING MODE** again - Hold  for 2 seconds until the status LED flashes **BLUE** and **RED** alternately. Speakerphone will disconnect with the 1st smartphone.
2. Repeat previous step to connect to the 2nd smartphone.
3. Tap "Avantree Roadtrip" on the 1st smartphone to reconnect them. And now, the speakerphone should be connected to both smartphones.

Reconnecting

Once the speakerphone is switched "ON", it will automatically reconnect to last connected phone. For other paired phones, please tap "Avantree Roadtrip" on your phone to reconnect.

Stream audio from car stereo (FM transmitter connection)

1. Slide OFF/ON/FM switch to "FM" position.
2. Choose a **vacant FM frequency channel from your car radio**. Most vacant channels contain constant static/buzz sound. These channels are commonly found below 90.0MHz and above 107.0MHz.
3. Rotate  to set the frequency of speakerphone to the same as your car radio. Now, you can stream your phone's audio from car stereo.

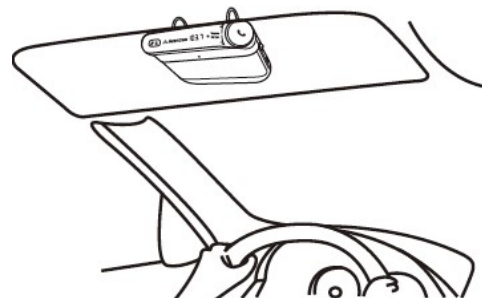

How to set FM frequency?

In FM transmitter mode, there are two ways:

- Rotate the knob switch to change the FM frequency steps to **0.1 MHz per step**.
- Press and hold the knob switch until the FM display flashes. And then, rotate the knob switch to change the FM frequency steps to **1 MHz per step**.

Install speakerphone to sun-visor

Clip the Avantree Roadtrip to the sun visor above the driver's seat.

Enable/Disable "Auto power on/off" function

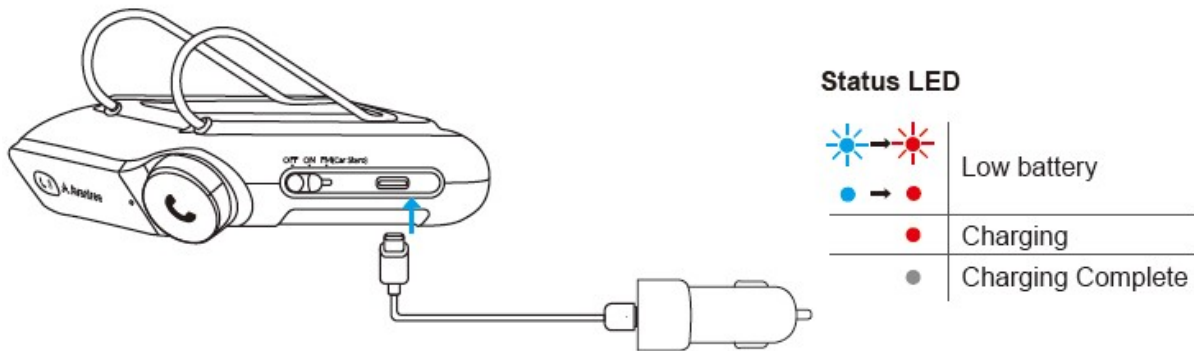

When the OFF/ON/FM switch is set to "ON" or "FM", the "Auto Power On" function is activated.

- **Auto power off** – When you leave your car and your phone disconnects from the speakerphone about 10 minutes later, it will auto turn off.
- **Auto power on** – Once you open your car door, the speakerphone will auto turn on.

The "Auto Power On/Off" function can be disabled by sliding the OFF/ON/FM switch to "OFF".

Charging

When you hear a "Low battery" prompt, or see the **RED** LED, you should charge the device. It will take about 1.5 ~2 hours to fully charge.

Clear pairing history/factory reset

Conducting a factory reset on the speakerphone will clear all past pairing data and restore the default settings for the product. You may want to reset your Roadtrip if you have trouble pairing them with your devices.

1. Put the speakerphone **into PAIRING MODE again** - Hold for 2 seconds until the status LED flashes **BLUE** and **RED** alternately.
2. Press twice to RESET the Roadtrip. The LED will briefly flash **PINK** before return to pairing mode, indicating that it has reset.
