Product Introduction

Product Overview

Button Functions

No.	Button	Functions
1	Multifunctional Button (MFB)	From off, press & hold for 2 seconds to turn the SoundJet R1 on
		From on, press & hold for 2 seconds to turn the SoundJet R1 into pairing mode
		From on, press & hold for 5 seconds to turn the SoundJet R1 off
		Press once to manually initiate reconnection to last-paired device
2	Volume + & -	Press once or hold to adjust volume
		Press & hold both for 6 seconds to clear pairing history (Reset)

LED Indicators

Indicator		Status
Headphones LED	Alternate red & blue flashes	Pairing
	Solid blue	Connected
	Blue flashes every second	Reconnecting to last-used device
	Blue flashes every 5 seconds	Standby
	Solid blue & red simultaneously for 3 seconds	Clearing pairing history
Battery & Charging led	Solid red	Charging
	Turns off	Fully charged
	Red flashes	Low battery

Connecting to Your Headphones

STEP 1

Turn on the SoundJet R1 by press the MFB button 2 seconds. For first time use, the SoundJet R1 will enter PAIRING mode automatically. For subsequent use, put your SoundJet R1 into PAIRING mode by pressing MFB until the LED flashes blue and red alternately.

STEP 2

Put your Bluetooth headphones into PAIRING mode.

*** NOTE:** Most cases where your device & the transmitter fail to connect happen because the device is not properly placed into PAIRING mode. Double check that your device is successfully in PAIRING mode (typically indicated by an LED indicator's alternate red & blue flashes). For more details, please refer to your device's online user

manual. AirPods in particular will always prioritize Apple devices for automatic pairing, so you'll need to turn your iPhone's Bluetooth OFF when pairing your AirPods with the SoundJet R1.

STEP 3

Keep the SoundJet R1 & your device close together and wait for 5-10s until they connect. Once connected, the indicator will turn solid blue.

Now Plug the SoundJet R1 into an in-flight entertainment system (Please contact us if you need a dual 3.5mm adapter.) or any other audio source with an AUX 3.5mm audio connector, you can enjoy the audio.

Adding a Second Pair of Headphones

You can connect and simultaneously listen through two pairs of headphones if desired.

STEP 1

Once your first device is successfully connected, put your SoundJet R1 into PAIRING mode once again by pressing & holding the MFB until another headphone LED flashes blue and red alternately.

STEP 2

Put your second pair of Bluetooth headphones into PAIRING mode. Please refer to your headphones' user manual for more details if necessary.

STEP 3

Keep the SoundJet R1 & your second device close together and wait for 5-10s until they connect. Once connected, both headphone indicators will turn solid blue.

***NOTE:** The dual headphones support function works with most headphones but not all. Certain true wireless earbuds in particular do not work well with Bluetooth transmitters' dual headphones mode. If you're not getting audio while dual linked, try turning the affected headphones off and then on again.

In some cases, dual pairing with AirPods may trigger their audio MUTE function. If this happens, put them back in their charging case (with the lid open) for 2 seconds, then take them out again to return them to normal. This may help to solve the problem.

Reconnecting Your Headphones

You typically do NOT need to re-pair your Bluetooth headphones with the SoundJet R1 every time. Once successfully paired, they should automatically reconnect when both devices are turned on (this may take a few seconds).

If your device does not automatically reconnect after 5-10 seconds, you can manually initiate reconnection by pressing the SoundJet R1's MFB once and waiting for 5-10 seconds.

If this still doesn't work, try initiating reconnection on your audio device as well (typically done by pressing the main Bluetooth PLAY button on your headphones once).

If they still don't connect, you may need to re-pair your device.

***NOTE:** If you paired your headphones with a different Bluetooth device, turn Bluetooth OFF on said device(s).

Charging

It is in low battery if the Battery & charging LED flashing red. Plug the provided USB C charging cable into the charging port, then connect the other end to a 5V/500mA-2A rated USB adapter (your phone charger or similar should work) or PC USB port.

A solid red light on the transmitter indicates that charging is in progress; the LED will turn off to indicate a full charge.

Specifications

Bluetooth version	v5.3
Supported profiles	A2DP; AVRCP
Audio codecs	aptX adaptive; aptX Low Latency, aptX, SBC
Input voltage / current	DC5.0V / 500Ma-2A
Operating range	Up to 33ft / 10m
Product dimensions	125mmx24mmx12mm
Net weight	15g
